01 // PROFILE

02 // CORE_COMPONENTS

03 // PROJECT_REPOSITORY

- Developed a digital Library Management System to streamline book inventory, student records, and issue/return tracking with an intuitive interface.
- Built an AI-powered traffic monitoring system using YOLOv8n and computer vision to detect and track vehicles from video streams, estimating real-time traffic density.

04 // SYSTEM_LOGS

05 // VAULTED_ACHIEVEMENTS

- **Active LeetCode Problem Solver:** Solved 20+ problems with a consistent active daily problem-solving streak in C++.
- **Hackathon Participant:** Participated in the Polaris Replit Vibeathon, collaborating on innovative agentic AI workflows.
- **Continuous Learner:** Completed foundational certifications in Python and Web Programming (CS50W).
